PETITION UNDER 37 CFR 1.181

The Commission is requested to exercise his supervisory authority and instruct the prompt issuance of the above application.

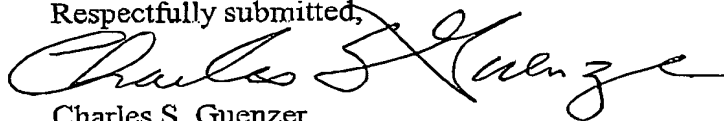

The Issue Fee in this application was paid on November 26, 2001 and the USPTO recorded payment on December 31, 2001. Beginning on June 10, 2002, the undersigned attorney or his assistant participated in approximately 53 telephone contacts or attempted contacts with PTO personnel in an attempt to issue the patent. Those contacts are summarized in the attached listing.

An initial problem, though never evidenced in PTO written communications, was that the USPTO erroneously filed the application under 35 U.S.C. §111 instead of the requested 35 U.S.C. §371. A petition was filed on June 10, 2002 to convert to a §371 filing.

Thereafter, the PTO file was lost at least once. Following a notice of lost file, dated May 2, 2003, Applicant filed a Reconstruction of File on May 2, 2003. This reconstruction filing was repeated on September 25, 2003. It appears that since early November 2003, the file has been held for approval of the petition to convert. We have been unable to obtain a date for decision or for further action.

The extraordinary and unreasonable delay in issuing the patent is affecting the interests and rights of the patentee and has incurred significant unreimbursed costs and time to the undersigned attorney. Prompt issuance of the patent is respectfully requested.

Respectfully submitted,

Charles S. Guenzer
